

Web Shop Guide

How to log in

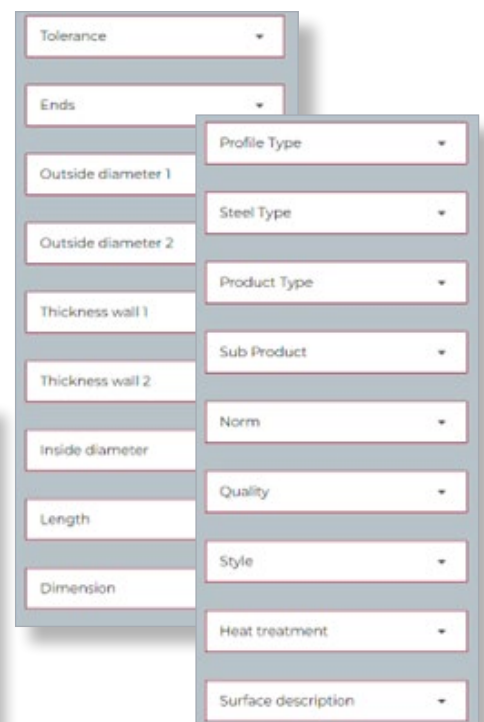

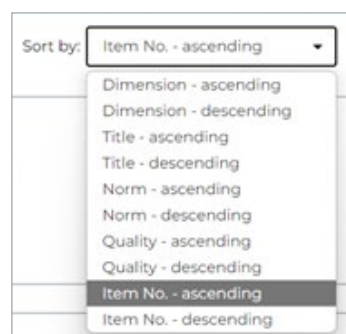

If you have already been provided your log-in details by one of the team, head to **My Account** or the person icon in the top right corner.

- Enter your details in the box and select **Login**.
- This takes you straight to your account dashboard where you can view your account information and order history.
- Select **Shop Now** on the banner to begin shopping.

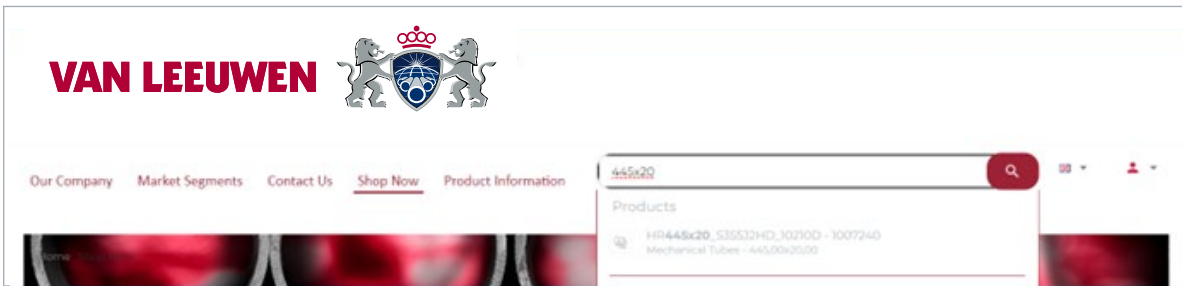

How to search for products

- When you select **Shop Now** you will be directed to the catalogue.
- You can search for a specific product by using the filters on the left hand side of the page.
- You can use a selection of filters and the products shown will represent the characteristics you have chosen.
- You can sort the filtered results by the options below.

Alternatively, you can use the search bar to find a specific product. This can be done by entering in the format: ODxWall Thickness or ODxID as guided by international standard. Examples below.

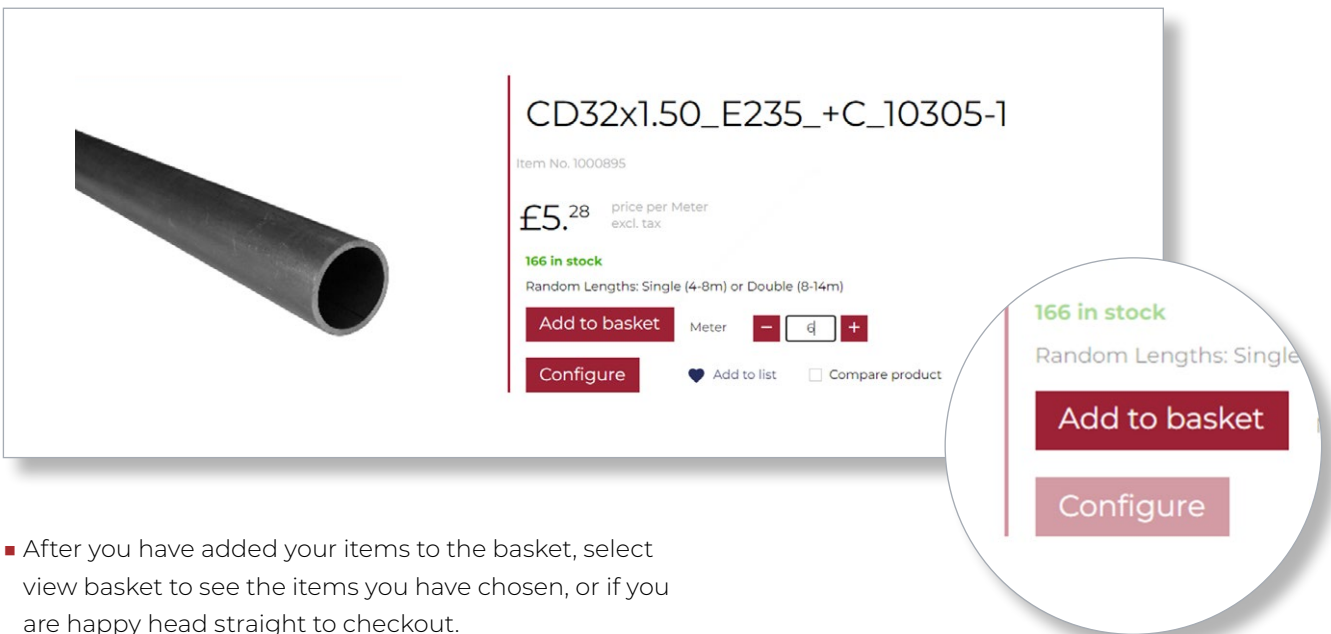

ODxWT: 38.00x2.00
 Rectangle: 38.00x25.00x1.50
 ODxID: 100.00x75.00

How to order products

When you have found the product you are looking for you will see the option to add the product to the basket, make sure to enter the correct quantity. Many tubes are stocked as single (4 to 8m long) or double (9 to 14m long) random

lengths. For ordering stock lengths, input a quantity in metres in multiples of 6m, unless the product description states a specific length, for cut pieces select configure (see product configuration section below).

- After you have added your items to the basket, select view basket to see the items you have chosen, or if you are happy head straight to checkout.
- In the basket you can amend the quantity, update need for a Test Cert or add a comment at item level.
- If you do not wish to place an order at this stage, when viewing your basket you have the option to receive a quotation. Just select the **Get quote** button and this will be saved to your **My quotes** area of your dashboard.

How to configure products (cut pieces)

If you wish to order a cut piece of tube, select configure when viewing the product. Select **Mid cut** for the tube to be middled, or fixed cut for a specified length.

Configuration ✕

Stock Lengths = We supply multiple lengths to match or exceed the requested quantity. The stock length is either detailed in the product description or supplied in single (4-8m) or Double (8-14m) Random Lengths. The delivery note will detail the actual meters supplied and invoice accordingly.

Mid cut = stock length cut in half with no strict tolerance. Supplied in multiples of the stock length. If length is not stated in item, it will be a random length between 4.8 and 8.0m long, base on 6m for ordering but chargeable at the meterage supplied.

Fixed cut = cut to an exact length with a controlled length tolerance. Quantity is the number of cut pieces required.

Processing type Select

Quantity Meter

Select
 Fixed cut
 Mid cut

Once you have chosen your cut type, then select

- Quantity – enter the number of cut pieces you desire.
- Length – enter the length (in mm) of your cut piece.
- Tolerance – is the tolerance on the cut length. The span is pre-advised and defaulted to a + only tolerance. You can change this to suit your needs, within the stated span (e.g. a 3 mm span could be +3-0, +2-1, +0-3 mm etc).
- Additional - You can also choose if you would like your tube deburred or washed when it is within our normal, in-house, capabilities.

When you are happy with your configuration, select **Add to cart** and your item(s) can be viewed in your basket ready for checkout.

Note – Our Web Shop is designed to cover standard stock and in-house production requirements. Additional stock range and more specialised processing options are available upon request. Please email or call the below if you cannot find what you want.

Please note that any change of address may effect order value.
